*McMillan Offshore Survival Training*

To Our Loyal Friends and Customers,

I want to "Thank" our many friends and customers who have recently contacted us requesting our Water/Helicopter Survival Training classes.

Recent events beyond our control have required us to re-structure and refocus our approach to training in the Gulf of Mexico, California and internationally. Like many businesses, we are discussing the options and possibilities of partnering with other training vendors in the Louisiana & Texas areas to meet the GOM training request.

At this time, we are offering Water/HUET classes in New England in conjunction with the Maine Maritime Academy for companies that have employees living in this part of the US and work in the GOM or internationally.

We are planning another series of Water/HUET programs in Carpinteria, California in the first quarter of 2011.

So, we are not abandoning our loyal and faithful friends. We have just hit a bump in the path of life. I was once told many years ago that McMillan Offshore was the "Guardian of the Gulf". We will continue to do our best to keep your vote of confidence and faith that industry has relied on for many years.

If you have questions or comments/suggestions, I can be reached at (207) 338-1603 or my cell phone is (207) 233-0787. We all need to pull together during these times.

Sincerely,

John McMillan
